Education

National Institute of Technology, Warangal

Nov 2021 - May 2025

Bachelor of Technology in Electronics and Communication Engineering

Experience

SAP Labs India

July 2025 - Present

Associate Developer

Bengaluru, India

- Developed CAP backend services with OData and Spring Boot APIs for test result management, tenant-aware script isolation, and execution workflows across **5 SAP HANA landscapes**
- Implemented locking and tenant-isolation strategies on **SAP BTP** to support **200+ concurrent test runs**, reducing failures by **30%**
- Developed a **React frontend** for test analysis and execution, featuring custom reports, centralized configuration, and branch-based workflows
- Built an **LLM Gateway** with agent orchestration across **50+ CAP tools** for execution-aware automation workflows
- Implemented async **failure classification workflows** achieving **91.5% average accuracy** and reducing manual analysis time by **60%**
- Designed a **streaming SSE chat pipeline** with conversation history and shareable sessions for execution analysis and debugging

SAP Labs India

May 2024 - July 2024

SDE Intern

Bengaluru, India

- Built a deepfake detection pipeline (EfficientNet-B4) trained on **140k+ samples**, achieving **98% validation accuracy**
- Built a Flask inference service supporting **300+ concurrent requests** with real-time image/video processing; optimized 1080p inference to **22 FPS**
- Tech: **Python, TensorFlow, Flask, OpenCV, WebRTC, React**

Projects

Railway Ticket Booking System

[GitHub](#)

- Built a **Spring Boot-based train booking system** supporting high-concurrency ticket reservations with locking and concurrency controls to prevent overbooking
- Designed an **event-driven workflow** for cancellations, refunds, and waitlist promotion with retry handling and low-latency search workflows reducing search response times by **40%**
- Developed secure booking and search APIs with **JWT-based authentication** and built a React frontend for reservation and availability workflows

OpenChess Analyzer

[GitHub](#) — [Live Demo](#)

- Built a full-stack **chess analysis platform** with Stockfish-powered move evaluation, blunder detection, and personal game archives supporting analysis of **1000+ games**
- Developed interactive gameplay and analysis workflows enabling real-time game review and chess improvement tracking

Technical Skills

Languages: **Java, C++, JavaScript, Python, React, SQL**

Backend & Frameworks: **Spring Boot, Node.js, SAP CAP, Express, Elasticsearch, LangGraph**

Databases & Messaging: **PostgreSQL, MySQL, Redis, Kafka**

Cloud & DevOps: **Docker, AWS (EC2, S3, SQS), Jenkins, Git**

Core Concepts: **Operating system, OOP, DSA, Networking, Concurrency, Design**

Achievements

- **99.32%ile** among **10+ lakh** candidates in **JEE Mains 2021**.
- **NTSE Qualified** and **District Topper** in Class X(97.6%) also secured 95.8% in Class XII (CBSE)
- Solved **500+ algorithmic** problems on LeetCode, Codeforces, and InterviewBit.
